

## Boxed-set of WTO Statistical Titles 2015

The latest comprehensive trade data from the WTO is now available in one complete, convenient package. WTO Statistical Titles 2015 brings together four content-rich volumes: International Trade Statistics 2015 offers an annual overview of the latest developments in world trade. The report provides detailed statistics on trade by region, merchandise trade by product, and trade in commercial services by category. World Tariff Profiles 2015 provides a comprehensive picture of tariffs and invaluable information on market access. The listing of the tariffs imposed by each WTO member on its imports is complemented with an analysis of the market access conditions it faces in its major export markets. Trade Profiles 2015 features a country-by-country breakdown of trade flows and trade policy measures for WTO members and countries seeking to join the WTO. Services Profiles 2015 contains statistics on key infrastructure services including transportation services, telecommunications, and financial and insurance services for 140 selected economies. The information is derived from multiple statistical domains, such as national accounts, employment, balance of payments, and foreign direct investment, as well as quantitative indicators from international and regional organizations.
