

How We Built A Low Cost Tornado Shelter

With the weather getting really crazy we needed a tornado shelter. We didnt have a lot of money to build one. After lots of research we decided to build an earthbag tornado shelter. This book describes how we built it with lots of pictures showing the process from the beginning to the end. It tells about where we located the tornado shelter, how we constructed the site, and how we laid the bags. It also tells about the ventilation system we used for lots of fresh air inside the shelter.
