

This book is for all the superhero nerds out there! If you love X-Men, The Avengers, Spiderman, Superman, Starwars, Startrek, DC Comics, Marvel, The Transformers, The Matrix, Dexter, Smallville, The X-Files, or Supernatural... you are probably a nerd and this book is right up your alley. Give it a read and a review if you are inclined. Sincerely, The Author (who is also a nerd) Jackson Wolfe: Detective on the Vigilante and Superhuman Investigations Department (V.S.I.D.) of the L.A.P.D. A transplant from Salt Lake City, Jackson is new to L.A. and its eccentricities. After a year, the city continues to shock and appall him. He is an excellent cop with an uncanny talent for reading people. Macy Grey: Jackson's partner on the V.S.I.D. Macys high, girly voice and tendency to embarrass him with public displays of affection keep Jackson in a constant state of apprehensive annoyance, but the initial stereo-typical bimbo impression she gives off masks a shockingly sharp intellect. He learns quickly not to underestimate her. Chief Munson: The often grumpy and always gruff Chief of the L.A.P.D. rebels against technology, preferring the old-fashioned way of doing things. Along with his age has come wisdom and the ability to know whats really going on even when everyone seems to think they can pull one over on him. Beneath the stodgy, salty exterior beats the heart of a hero behind the heroes. Father Time: Retribution incarnate, he is only aware of his prime objective, moving toward it relentlessly under the cover of night. Black mask, armor, and cape make him an intimidating figure, capable of striking fear in the fearless. An hourglass glows in the center of his powerful chest, symbolizing his ability to bend time by stopping, rewinding, or fast-forwarding it in approximate 10 minute increments. This power assures his success in reaching his objectives. Is he hero or villain? You decide. Orion: The sleek, futuristic A.I. vehicle belonging to Father Time. His sentience and self-awareness come as a surprise to his owner, triggering a chain-reaction that quite possibly results in Father Times awareness of his own sentience. The Vigilantes: An unknown number of individuals who take the law into their own hands, picking up where official law falls short. They are seen as heroes by the public they defend, threats by the criminals they undermine, and outlaws by the authorities. Whats more, they are reported as having abilities that defy nature and, if proven true, would classify them as super-human. Meet these epic new characters and a handful more in this original, dark, superhero story disguised as a crime/mystery novel that is written for the 18+ age group. Synopsis: Detective Jackson Wolfe thought he had stepped into the pages of a comic book. The first indication was the unlikely partner hed been paired with. Macy Grey was a seemingly naive, annoying-yet-beautiful blonde bimbo. He was further astounded when he learned the nature of their department. He had been assigned to the highly confidential and brand new V.S.I.D... or The Vigilante and Super-human Investigations Department. Wait... what? Did old Chief Munson have a sense of humor after all? Were they pranking the new kid on the block? Jackson didnt buy it. Go forth! Track down and arrest thee Spiderman... and his cohorts!. Well, it was no prank. Whats more, it didnt prove to be an easy task. The alleged super-powered vigilantes were apparently much better equipped and far better trained than the police or F.B.Is most valued and effective members. This just fueled the desire to put a stop to them. After all, no one should be allowed to apprehend criminals without doing mountains of paperwork! Book 2 entitled A Time to Die has been published and picks up where this one leaves off. Look for it on Amazon and dont forget to give both your 5 star rating and a raving review!
