

## Aramicus

Jerry is an average boy who struggles at school and hates math. He lives in a small town called Avon with old-fashioned people who love peace and quiet. He is small, messy, cheerful, has a good humor and likes to joke around with his classmate and friend, Ralph. They are the best of friends and do almost everything together. Then one day, two strange, shady creatures show up in the town out of nowhere and settle in a desolate place. They are very aggressive and attack anyone who comes near. It's a mystery to the boys who these fearsome creatures are and soon they decide to take some action and find more about them. Suddenly, one fine day, when the children have almost forgotten about their thrilling adventure and the mysterious creatures, they go to school to find it completely empty and their teachers turned into zombies. They find other children in the school and manage to escape. They are shocked to find that the whole town is empty and they are probably the only survivors. They realize that they are just a bunch of school children left to survive in the middle of a zombie apocalypse. They take up refuge in Jerry's house and try to fend off the flesh-eating zombies that are roaming outside their house and lying on their porch. They need to get food, but if they venture outside, they will be like turkeys on Thanksgiving. It won't be easy, but the children try their best to co-exist, learn to cook food, try to get to find a solution to put an end to the horror of the apocalypse, entertain themselves when they start getting bored of their self-inflicted house arrest and much more. After all, they are children with zero life skills and try to make light of the situation by looking at the bright side of the apocalypse. They whack, bang and dump zombies, share jokes and try to keep Jerry's brother, who might have been bitten by a zombie, from eating them alive; all the while trying to contact friends and trying to

find out if there are other survivors.
