

Executive Report on Strategies in Saudi Arabia

This report provides a strategic profile of Saudi Arabia. It does so by compiling published information that directly relates to latent demand and accessibility. The reader new to Saudi Arabia can quickly understand where Saudi Arabia fits into a firm's strategic perspective. In what follows, Chapter 2 is a general evaluation of the accessibility of Saudi Arabia, with particular focus on investment and business conditions. In Chapter 3, I report my findings on the real economic potential, or latent demand, represented by Saudi Arabia when defined as an area of dominant influence.
