

Tyranny of Malice

With examples varied as Iago, John De Lorean, Margaret Thatcher and the IRA, Dr. Berke explores the driving forces behind unusually greedy, spiteful, and destructive behaviour. He also shows how envy, greed and jealousy beget universal impulses to wreak revenge and to seek conformity (for fear of the evil eye). Ingrained in our earliest experience, negative states of mind are an essential part of being human, Dr. Berke believes. He goes on to examine how malicious feelings are fostered and expressed in conflicts within families; and how they erupt onto the larger stage of society in vandalism and terrorism. Envy, greed and jealousy can also engender destructive tensions between nations - not least between wealthy, industrialized ones and those of the Third World. In what Dr. Berke calls the politics of malice, countries both oppress their own citizens and foster aggressive nationalism: the Holocaust being this century's most devastating example. The overall purpose of his work is to develop a detailed understanding of our capacity for destruction, as well as for making good. As he demonstrates, when the negative sides of our emotional life are denied or ignored (due to fear or guilt) the positive sides suffer too, for love and hate are inextricably bound. In this bold and redeeming book, Dr. Berke shows us how gratitude, generosity, and compassion act as healing counterparts to the dark emotional forces that complicate our lives. Dr. Joseph Berke has lived and worked in England since 1965, practicing as an individual and family psychotherapist. After completing his medical training in New York, he came to London to advance his studies of the origin and treatment of schizophrenia. In 1970 he became the co-founder and director of the Arbours Association, which sponsors unique facilities including the Crisis Centre, where people in emotional distress can go for help

and to live. Dr. Berke is co-author of the critically acclaimed *Mary Barnes: Two Accounts of a Journey through Madness*, as well as numerous other books and articles.
